# The Expeller™

## WHAT WE DO

Mouse Free's unique formula stops the entry of mice into your RV. We stop mice and other pests from entering through the small holes and cavities on the under side of your motorhome or trailer.

## HOW WE DO IT

Simply put, a lubricating non drip coating scented with 100% natural essential oils is applied to the entire undercarriage of your RV. This provides two very unique ways to repel mice:

1. Mice have a very acute sense of smell. The scent of natural essential oils are overwhelming to mice, and drive them away.
2. The non drip oily coating is much too slippery to travel across. The coating is impassable by any mouse, squirrel, or insect – even ants! If it doesn't have wings, we keep them out!

The product works so well at preventing mice from entering your trailer or motorhome, that we named our product **The Expeller™**

Canada and U.S patent pending on composition and process.

**NO DRIP**  | **NO MESS** | **NON-TOXIC**

## PREVENT & PROTECT

**Does your wife think mouse proofing is worth it?**

She will say "**ABSOLUTELY!** It is the most important thing! I won't step foot inside the RV until I know it is mouse-free! It also saves us hours of cleaning and disinfecting after we find mouse droppings. Not to mention the damage they can cause by chewing on the electrical wiring".
